Tiny Tove is Swedish, she was brought into pornography by her mother. Tove's mom worked as an x-rated actress and often bragged to Tiny Tove about it being the ultimate lifestyle. Tove's father sadly died at an early age. Not much is known about Tiny Tove because her career in pornography was short but sweet. What is known is that Tove got into the business soon after turning 18 years old. With the loss of her father at an early age, her mother became her inspiration. Already a pornstar, Tove's mother apparently persuaded her to try porn out for herself. In fact, they appear together in one movie. After a few short years in the business, Tiny Tove quit and decided to go on a round-the-world cruise. She also vowed to pursue her privacy which continues to be respected to this day. The film shoots were laid down on Super 8-mm film but have survived the test of time. Not everything that Tove made is available but the majority was preserved by the infamous Color Climax Corporation. Filmography
